**THAI - CANADIAN**

**NUCLEAR HUMAN RESOURCES DEVELOPMENT**

**LINKAGE PROJECT**

**TRAINING PROGRAM**

**THERMAL STUDY OF NUCLEAR  
REACTORS**

**REFERENCE TEXT**

written by

**Dr. Altan Tapucu**  
**Ecole Polytechnique, Montreal, Canada**

**SPONSORED BY**

**ATOMIC ENERGY OF CANADA LIMITED**  
**CANADIAN INTERNATIONAL DEVELOPMENT AGENCY**  
**ELECTRICITY GENERATING AUTHORITY OF THAILAND**  
**OFFICE OF ATOMIC ENERGY FOR PEACE**

## Table of Contents

Chapter 1	Fundamental Concepts.....	1.1
1.1	Definitions: Continuum, System and Control volume.....	1.1
1.2	Material and Spatial Coordinates.....	1.1
1.3	Material and Spatial Derivatives .....	1.3
1.4	Dilatation (Euler’s Expansion Formula).....	1.5
1.5	Reynolds Transport Theorem .....	1.7
Chapter 2	Single – Phase Fluid Equations.....	2.1
1.1	Local Fluid Equations.....	2.1
1.1.1	General Local Conservation Equation.....	2.1
1.1.2	Fluid Conservation Equations .....	2.2
1.2	Macroscopic Fluid Equations .....	2.5
1.2.1	Generalized Volume Averaged Conservation Equations ...	2.6
1.2.2	Volume Integrated Conservation Equations.....	2.6
Chapter 3	Principles of Heat Transfer .....	3.1
1.1	Mechanisms of Heat Transfer.....	3.1
1.2	Conduction Heat Transfer.....	3.9
1.2.1	General Conduction Equation .....	3.9
1.2.2	Initial and Boundary Conditions.....	3.13
1.2.3	One Dimensional Steady State Conduction.....	3.17
1.2.3.1	Conduction Heat Transfer in a Slab.....	3.18
1.2.3.2	Conduction in Cylindrical Geometry.....	3.26
1.2.4	One Dimensional Time Dependent Conduction .....	3.31
1.2.4.1	Lumped System Approach-System with High Conductivity .....	3.32
1.2.4.2	Systems with High Surface Conductance...	3.36
1.2.4.3	System with Finite Internal Conductivity and Surface Conductance .....	3.38
1.2.4.4	System with Finite Internal Conductivity and Surface Conductance and Subject to Sudden Heat Generation .....	3.40

## **4. Forced Convection Heat Transfer**

- 4.1 Fundamental Aspects of Viscous Fluid Motion and Boundary Layer Motion**
  - 4.1.1 Viscosity**
  - 4.1.2 Fluid Conservation Equations – Laminar Flow**
  - 4.1.3 Fluid Conservation Equations – Turbulent Flow**
- 4.2 The Concept of Boundary Layer**
  - 4.2.1 Laminar Boundary Layer**
    - 4.2.1.1 Conservation Equations – Local Formulation**
    - 4.2.1.2 Conservation Equations – Integral Formulation**
  - 4.2.2 Turbulent Boundary Layer**
- 4.3 Forced Convection Over a Flat Plate**
  - 4.3.1 Laminar Boundary Layer**
    - 4.3.1.1 Velocity Boundary Layer – Friction Coefficient**
    - 4.3.1.2 Thermal Boundary Layer – Heat Transfer Coefficient**
  - 4.3.2 Turbulent Flow**
    - 4.3.2.1 Velocity Boundary Layer – Friction Coefficient**
    - 4.3.2.2 Heat Transfer in the Turbulent Boundary Layer**
- 4.4 Forced Convection in Ducts**
  - 4.4.1 Laminar Flow**
    - 4.4.1.1 Velocity Distribution and Friction Factor in Laminar Flow**
    - 4.4.1.2 Bulk Temperature**
    - 4.4.1.3 Heat Transfer in Fully Developed Laminar Flow**
  - 4.4.2 Turbulent Flow**
    - 4.4.2.1 Velocity Distribution and Friction Factor**
    - 4.4.2.2 Heat Transfer in Fully Developed Turbulent Flow**
    - 4.4.2.3 Non-Circular Tubes**

<b>Chapter 7</b>	<b>Heat Removal from Nuclear Reactors</b>	
1.1	Generation of Heat in Nuclear Reactors .....	7.2
1.1.1	Thermal Energy Release During Fission.....	7.2
1.1.2	Volumetric Heat Generation Rate in Reactor Fuel .....	7.3
1.1.3	Spatial Volumetric Heat Generation Distribution in the Reactor Core.....	7.4
1.1.4	Determination of the Maximum Neutron Flux.....	7.8
1.2	Thermal Study of a Reactor Channel.....	7.10
1.2.1	Maximum and Average Linear Power of the Fuel Channel	7.10
1.2.2	Basic Equations for the Thermal Study of a Fuel Channel	7.11
1.2.3	Coolant Temperature Along the Fuel Channel.....	7.14
1.2.4	Thermal Study of the Fuel Rod .....	7.16
1.2.4.1	Temperature of the Cladding .....	7.16
1.2.4.2	Gap Conductance Between the Fuel and Cladding .....	7.18
1.2.4.3	Surface Temperature of the Fuel.....	7.24
1.2.4.4	Temperature Distribution in the Fuel.....	7.25
1.2.4.5	Temperature Distribution in a Fuel Rod with Neutron Flux Depression .....	7.36
1.2.5	Concluding Remarks on the Fuel Channel Temperatures	7.38
1.3	Pressure Drop in Fuel Channels and Pumping Power.....	7.40
1.3.1	Pressure Drop Through the Fuel Channel .....	7.40
1.3.2	Power Required to Circulate the Coolant – Pumping Power	7.43
1.4	Net Mechanical Power of the Fuel Channel.....	7.45
1.4.1	Optimum Operating Point of a Channel .....	7.48
1.5	The Choice of Coolant for Reactor .....	7.49
