

# Estimate your personal annual radiation dose.

We live in a radioactive world – humans always have. Radiation is part of our natural environment. We are exposed to radiation from materials in the earth itself, from naturally occurring radon in the air, from outer space, and from inside our own bodies (as a result of the food and water we consume). This radiation is measured in units called millirems (mrems). The average dose per person from all sources is about 360 mrems per year. It is not, however, uncommon for any of us to receive far more than that in a given year (largely due to medical procedures we may undergo). International Standards allow exposure to as much as 5,000 mrems a year for those who work with and around radioactive material.

| FACTORS                                   | COMMON SOURCES OF RADIATION  | YOUR ANNUAL DOSE (MREMS)          |
|---|--|-----------------------------------|
| WHERE YOU LIVE                            | <b>Cosmic radiation</b> (from outer space)<br>Exposure depends on your elevation (how much air is above you to block radiation).<br>Amounts are listed in mrem (per year).<br>At sea level.....26 mrem    2-3000 ft.....35 mrem    6-7000 ft.....66 mrem<br>0 - 1000 ft.....28    3-4000 ft.....41    7-8000 ft.....79<br>1-2000 ft.....31    4-5000 ft.....47    8-9000 ft.....96<br>5-6000 ft.....52<br>[Elevation of cities (in feet): Atlanta 1050; Chicago 595; Dallas 435; Denver 5280; Las Vegas 2000; Minneapolis 815; Pittsburgh 1200; St. Louis 455; Salt Lake City 4400; Spokane 1890.] | _____ mrem                        |
|   | <b>Terrestrial</b> (from the ground)<br>If you live in a state that borders the Gulf or Atlantic Coasts, add 16 mrem<br>If you live in the Colorado Plateau area (around Denver), add 63 mrem<br>If you live anywhere else in the continental US, add 30 mrem.   | _____ mrem                        |
|   | <b>House Construction</b><br>If you live in a stone, adobe, brick or concrete building, add 7 mrem   | _____ mrem                        |
|   | <b>Power Plants</b><br>If you live within 50 miles of a nuclear power plant, add 0.01 mrem<br>If you live within 50 miles of a coal-fired power plant, add 0.03 mrem   | _____ mrem                        |
| FOOD WATER AIR                            | <b>Internal Radiation***</b><br>From food (Carbon-14 and Potassium-40) & from water (radon dissolved in water)   | _____ 40 mrem                     |
|   | From air (radon)   | _____ 200 mrem                    |
| HOW YOU LIVE                              | Weapons test fallout (less than 1)*  | _____ 1 mrem                      |
|   | Jet Plane Travel   | _____ .5 mrem per hour in the air |
|   | If you have porcelain crowns or false teeth**  | _____ .07 mrem                    |
|   | If you wear a luminous wristwatch  | _____ .06 mrem                    |
|   | If you go through luggage inspection at airport  | _____ .002 mrem                   |
|   | If you watch TV*   | _____ .1 mrem                     |
|   | If you use video display terminal (computer screen)*   | _____ .1 mrem                     |
|   | If you have a smoke detector   | _____ .008 mrem                   |
|   | If you use a gas camping lantern   | _____ .02 mrem                    |
| If you wear a plutonium-powered pacemaker | _____ .100 mrem  |                                   |
| MEDICAL TESTS                             | <b>Medical Diagnostic Tests – Number of millirems per procedure</b><br>X-Rays: Extremity (arm, hand, foot, or leg).....1    Dental.....1    Chest.....6<br>Pelvis/hip .....65    Skull/neck..... 20    Barium enema.....405    Upper GI.....245<br>CAT Scan (head and body).....110<br>Nuclear Medicine (e.g., thyroid scan).....14  | _____ mrem                        |
|   | <b>YOUR ESTIMATED ANNUAL RADIATION DOSE</b>  |                                   |
|   | _____ mrem   |                                   |

\* The value is less than 1, but adding a value of 1 would be reasonable.

\*\* Some of the radiation sources listed in this chart result in an exposure to only part of the body. For example, false teeth or crowns result in a radiation dose to the mouth. The annual dose numbers given here represent the "effective dose" to the whole body.

\*\*\* Average values.
